Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13, 21-25 and 31-39, drawn to a process of making three-dimensional objects, classified in class 264, subclass 308.

II. Claims 14-20, 26-30, 40-48 and 58-60, drawn to an apparatus for making three-dimensional objects, classified in class 425, subclass 375.

III. Claims 49-57, drawn to a process of making three-dimensional objects, classified in class 29, subclass 527.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-III and II-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated principally because the invention of Group III requires an assembly step (i.e., "inserting a support insert") which is not required in the invention of Group I or Group II.

Art Unit: 1732

3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as a process of applying a coating material onto a preformed object or product.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must

be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
